GX4® GAS MONITOR

MULTIPLE GAS DETECTION CAPABILITIES

The RPB GX4 Gas Monitor gives you complete confidence that the supplied/compressed air you and your employees breathe is safe. By detecting when there are dangerous levels of toxic gases, this monitor ensures you'll be protected for life's best moments.

Gases such as carbon monoxide are invisible to all the human senses yet are commonly found in industrial premises worldwide. Although low-level exposure may not be immediately fatal, ongoing contact at low levels has a cumulative effect, causing serious illness and long-term health concerns.

The GX4 detects multiple gases simultaneously. With smart device and cloud integration capabilities included this enables you to view your air quality from any device, in real time.

Connect to the GX4 from your laptop, tablet, phone or even network to view real time data, download logs, alter alarm points and much more.

GAS SENSORS

Our range of pre-calibrated gas sensors have been updated to fit an improved sensor while incorporating an ergonomic design for simple removal and replacement. Available in CO, O2 and H2S, all with a 2-year shelf life.
